

# Jump-start your grad **experience,** not your grad tuition!

## University of Pittsburgh Graduate School of Public Health **Accelerated Bachelor's/Master's Program**

Considering a career in health? Planning to attend graduate school? With Pitt Public Health's accelerated bachelor's/master's program, you can reach your goals sooner.

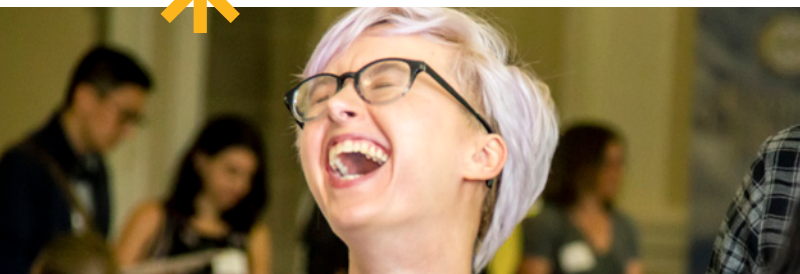

Motivated students with the appropriate undergraduate coursework can **earn both degrees in just five years**—*saving a full year of time and thousands of dollars in tuition.*

Apply to the accelerated program in your third year and take graduate courses in your fourth year. You'll participate fully in the graduate school experience:

- **developing new skills** with advanced coursework in leadership, communication, planning, and analysis
- **gaining experience** in applying evidence-based approaches to public health through a practicum project or field internship
- **working with world-class researchers** to understand and solve vital, real-world problems

Graduate school is both challenging and rewarding. And with the accelerated program, a master's degree can be closer than you think.

## What is public health?

You might be surprised by how your undergraduate major fits into public health. It's such a versatile field with different opportunities for every person. Whether you like to crunch numbers, conduct laboratory or field research, formulate policy, or work directly with people to help improve their health, there is a place for you. Public health professionals work around the world, solving health problems in communities both near and far, contributing to scientific discoveries, and transforming the well-being of societies.

## Pitt Public Health Departments. Find your fit.
