

## Clinical Research Coordinator

### Who we are

The [Breathe Chicago Center](#) at the [University of Illinois at Chicago](#) conducts research in COVID-19 and chronic lung disease funded by the [National Institutes of Health](#), the [Patient-Centered Outcomes Research Institute](#), and foundations. We conduct studies in collaboration with academic health centers in Chicago and across the U.S.

### Our team

We are a [multi-disciplinary team](#) of research coordinators, informaticians, regulatory specialists, designers, physicians, nurses, epidemiologists, and statisticians. We develop, test, and implement innovative, data-driven strategies to investigate and improve COVID-19 outcomes in the community we serve as well as the broader population. We work to improve lung health in patients with asthma and COPD, and seek to understand the impact of COVID-19 in these vulnerable populations. Our results are [published](#) in peer-reviewed medical journals.

### Are you a good fit for our team?

- You have a passion for helping people breathe better, especially those typically underrepresented in research but who bear a disproportionate burden from COVID-19 and chronic lung disease
- You enjoy engaging with study participants via phone, in-person, and value building a relationship of trust
- You demonstrate attention to detail in completing study procedures, data entry, and regulatory submissions
- You like to problem-solve and teach others how you did it
- You are excited to identify and implement new approaches to recruiting study participants
- You like to learn from your colleagues and through participating in courses and workshops
- Qualifications: Bachelor's degree. Candidates with two years of clinical research experience preferred.

UIC prioritizes the health of their staff, and all precautions when interacting with COVID-19 patients will be adhered to according to University of Illinois Hospital & Health Sciences System policies as well as those of the Centers for Disease Control and Prevention.

### **Benefits**

UIC offers a full benefits package including health insurance, paid leave time, and tuition assistance.

### **Join us**

If you are interested in joining our team, contact Lauren Castro, Director of Clinical Research Operations, at [lschra3@uic.edu](mailto:lschra3@uic.edu).
