

East Palestine Train Derailment Health Studies

Support for these research studies was provided by grants from the National Institute of Environmental Health Sciences, National Institutes of Health

Profiling the Post-accident Exposome in East Palestine

What will the study do?

We will look at the impact of the disaster on people, crops, and livestock over time.

What will you take samples of?

We will collect sediment, soil, and water samples. We will look at the possible health risks over time from contaminants from the disaster.

What are the eligibility requirements?

Since environmental sampling will take place in public locations, there are no eligibility criteria.

Who is leading the study?

Peng Gao

Where can I get more information?
